WHITEPAPER

The background of the lower half of the image is a vibrant, futuristic cityscape. In the foreground, a woman with long, flowing blonde hair is shown in profile, looking towards the horizon. She is wearing a dark, high-tech jacket with a prominent hexagonal patch on the back. The city below her is a sprawling metropolis with tall, slender skyscrapers and a complex network of roads and bridges. In the sky, several sleek, dark spacecraft are visible, some in flight and others hovering. The overall color palette is dominated by warm, golden-yellow and orange tones, creating a sense of a bright, high-tech environment.

LEGAL DISCLAIMER

You are required to read this legal disclaimer and pay close attention to this section's content. Should you have any doubts, it is best that you seek advice from a lawyer, financial advisor, taxation expert, or any other competent law practitioner.

All of the information provided in this document is not intended to be complete, and it should never be construed as a part of different contractual arrangements.

It is our firm conviction that the information provided in this whitepaper is accurate and up to date. Furthermore, all information relating to all of our products, services, technical architecture, token distribution, and company timelines is accurate and up to date.

All of the materials in this document may change without notice, and they can never be considered a signatory agreement of advice.

NO ADVICE

This whitepaper is by no means a contractual obligation by any parties to make a commitment to contribute to the project. This whitepaper also does not constitute any form or part of any opinion that can be construed as advice, or that can be used to sell or solicit any offer by Trillions to purchase our token, nor shall it be construed as a part of any effect that can be used in the formation of a contract or an investment decision.

COMPLIANCE AND TAX OBLIGATIONS

All users of the website are entirely responsible for determining what, if any, taxes apply to their transactions. The website's owners and authors are not responsible for determining which taxes apply to transactions.

LIMITATION OF LIABILITY

W3M Token shall not be held liable for any loss or harm resulting from the use of this website's material, including but not limited to written material, links to third-party sites, data, quotations, charts, and buy/sell signals. Please ensure that you are fully informed about the risks and expenses of trading assets in the financial markets (digital or otherwise). In particular, ICOs are one of the riskiest investment opportunities, and there is a chance that you will lose your entire investment.

INVESTMENT RISKS

There is a high level of risk associated with trading cryptocurrencies. Therefore, cryptocurrency trading may not be suitable for all investors. You should carefully evaluate your investment goals as well as your level of expertise and your appetite for risk before engaging in cryptocurrency, token, or any other digital asset trading.

INTRODUCTION

The cryptocurrency space has evolved so much over the last decade, and Satoshi Nakamoto's decentralized virtual currency, Bitcoin, has unlocked a multitude of possibilities, with the number of blockchain use cases growing by the day.

There are now hundreds of cryptocurrency and blockchain projects in the market. These projects are either meme tokens, utility tokens, stablecoins, or ordinary cryptocurrencies.

PROBLEMS THAT THE W3M TOKEN TEAM HAS IDENTIFIED

With the rapid rate of innovation in the blockchain space, some problems have emerged, namely the rate of adoption of cryptocurrency worldwide, the associated increased barrier to entry into the newly-developed blockchain protocols and products, and the highly volatile nature of cryptocurrencies and their respective prices.

VOLATILITY

The cryptocurrency market is one of the most volatile markets in existence at the moment. This is mainly due to it not being regulated globally. As a result, prices in the cryptocurrency markets can fluctuate within a wide range. This may enable quick gains for cryptocurrency traders and investors but it also increases the probability of cryptocurrency investors and traders losing a large portion of their investments, if not all of it.

In addition to the highly volatile nature of the cryptocurrency markets, cryptocurrencies are traded 24/7 every day of the year. This makes it more difficult for investors to maintain their profits and keep track of their cryptocurrency investment portfolios.

BARRIER TO ENTRY

Blockchain and cryptocurrency are revolutionary technologies because they enable the decentralized transfer of value without the need for an intermediary such as a bank or any other central institution.

In addition to the decentralization that the two technologies allow, blockchain network participants have full control of the value that they choose to store and transact with on the network that they are using.

Given the fact that blockchain and cryptocurrency are relatively new technologies, there are a very limited number of on-ramp and off-ramp solutions for people that want to transact on the blockchain. Furthermore, the mainstream financial system is also slow in terms of integrating with the blockchain realm.

The combination of users having to take control of the value that they want to use on the blockchain, as well as the very limited integration that exists between the blockchain space and the legacy financial system, has to have created a high barrier to entry for potential blockchain network participants.

The barrier to entry is further increased for people living in developing or third-world countries that may not have access to the legacy financial system.

SLOW RATE OF ADOPTION

The rate of adoption of cryptocurrency and blockchain technologies worldwide has been significantly slower than the rate that was anticipated the public's introduction to blockchain technologies.

This is mainly due to potential investors fearing the cryptocurrency space, or just not understanding the benefits that cryptocurrency and blockchain technologies have to offer. The second contributing factor that has held back the global adoption of cryptocurrency is the fact that the cryptocurrency space is unregulated.

DISPERSED CRYPTOCURRENCY PROTOCOLS

Cryptocurrency protocols and innovations are dispersed all over the place, and there is not one single platform where users can access all of these protocols. For example, some platforms will only give users access to NFTs but not other Decentralized Finance (DeFi) protocols such as staking or yield farming.

LACK OF COMMUNITY-DRIVEN TOKENS WITH UTILITY

The majority of the projects in the current market are not fully decentralized or are not driven one hundred percent by their communities. Some of the biggest cryptocurrencies by market cap are still influenced by their development teams and/or the project's founding team members.

Projects that are fully decentralized and that are fully community-driven usually do not have high levels of utility linked to them. Plus, these projects normally comprise just a token or coin and do not include other DeFi protocols such as staking, yield farming, a metaverse, NFT marketplaces, etc

WHAT IS W3M TOKEN?

W3M Token is a cutting-edge blockchain utility token specifically created for the metaverse ecosystem that the project has to offer. It has been built on the Binance Smart Chain (BSC) and Ethereum Network, which is one of the fastest-scaling and most secure blockchain networks in the blockchain space.

Our team developed the project with the intention of making it a completely community-driven project that will take the entire crypto space to new heights. We aim to create an all-encompassing platform in which users can access an array of metaverse and blockchain facilities all in a single ecosystem.

Web3Met aims to unblock the future and open a welcoming metaverse city where people can do events, launch parties, and trade. Watch a bustling digital utopia unfolding before your eyes.

One of our main goals in this regard is to provide people with a safe and trustworthy place where they can use their cryptocurrency for rewards and participate in the staking, buying, and selling of NFTs. W3M Token will be the native utility token of our platform that will allow you to take part in all of the features that our platform has to offer, including staking, an NFT marketplace, and the metaverse.

VISION

We envision becoming the gateway into the future and creating a new world for all of our users through our one-of-a-kind ecosystem.

MISSION

Our mission is to provide every holder with simple and effective ways to gain exposure to digital assets by paving the path for cryptocurrency adoption growth and providing an equal opportunity to everyone in the virtual world that is free of discrimination.

W3M TOKEN VIRTUAL LAND

W3M Token has been built with the core purpose of being one of the best decentralized technology frameworks available, and will simultaneously make a positive impact of equal magnitude on our community through its utilization and implementation in our ecosystem.

W3M Token will balance all aspects of our protocol as well as achieve justifiable long-term growth with deliberately developed tokenomics. We are busy revolutionizing the decentralization movement with a purely community-driven ecosystem. Our project is more than just metaverse: we are the future of decentralization. Our ecosystem will enable censorship-resistant swapping in an open-source environment that is built on top of modular frameworks.

STAKING

Our staking platform is a great way to maximize your holdings, and is a much better alternative than just letting your W3M Token sit in your account. By staking W3M Token, you can earn a passive income in W3M Token on top of your original holdings. This has a compounding growth effect on your W3M Token holdings, benefiting from the potential rise in W3M Token's price.

Not only are users incentivised by the project to stake their tokens, staking also has the added benefit of securing the network. Thus making the W3M Token network and the broader W3M Token ecosystem more secure, allowing you to transact with the peace of mind that the network has top-notch security.

BUY DIGITAL LAND

Web3Met will have digital plots of land up for sale. Channel your inner digital realtor. Owning a digital land means you can customize your space and even rent it out for events. It's gonna be a big busy town!

TRADE NFTS IN THE METAVERSE

In Web3Met you can buy, own, and sell your NFT land property. Build your shop in the seller's marketplace or build your own store within your digital space. The choice is yours!

PROMOTE YOUR BUSINESS

Whether you're an NFT artist or a blockchain project founder, you can always enter Web3Met to meet and tap digital citizens. Simply register on our sellers' platform and be ready to do business virtually.

W3M TOKEN'S ATTRIBUTES

FAST TRANSACTIONS

Our underlying, super-performant blockchain that powers our all-encompassing ecosystem has a competitive throughput, enabling super-fast transactions. This is one of the main attributes of our ecosystem that separates it from our competitors in the market.

LOW TRANSACTION FEES

Many of the leading blockchain networks currently in the market charge unreasonably high transaction fees. This is mainly in times when the network is congested, and is a result of the network's limited scalability and slow transaction speeds. Since our network has super-fast transaction speeds, it can scale better than our competitors in the market - enabling very low transaction fees. W3M Token's network is one of the few blockchain networks in the market that have next-to-nothing transaction fees.

COMMUNITY-CENTRIC

W3M Token is a community-driven project that hands the destiny and the future of the project over to its rapidly-growing community. This may sound like a meme coin or token, but W3M Token is far from it given its high levels of utility and the ecosystem's suite of blockchain protocols and products.

NO CENTRAL POINT OF FAILURE

The W3M network is completely decentralized, making it a distributed network of nodes. As such, there is no central point of attack or weakness that can be exploited by hackers - making the network as secure as possible. Furthermore, the high decentralization factor ensures that the W3M network cannot be taken down by any authority or institution.

SOVEREIGN SYSTEM

W3M Token is a decentralized, global digital currency that is complete with an optimized infrastructure. The network is a combination of intense academic research, and is a clever mixture of all of the latest and proven blockchain technologies.

SECURED ECOSYSTEM

Since the W3M ecosystem is built on top of a blockchain network, it has inherent security features which are essential for protecting and maintaining the integrity of the ecosystem's digital ledger.

PERFECT YOUR SPACE IN A METAVERSE

Now is the time to build the shop of your dreams! In Web3Met, you can own digital lands and set up your own business. Sounds fun right?

W3M TOKEN NFT

The W3M ecosystem will soon include its own NFT platform, which users can sign up on and claim their own NFT characters or land. The unique fundamental features of the NFTs will give each of them a distinct value, and these NFTs will be categorically distinguishable from any other forms of assets currently available in the entire cryptocurrency market. These characteristics include verifiable uniqueness and indivisibility. Also, since each NFT's underlying code can be viewed by the public, the scarcity and ownership of any of the ecosystem's NFTs can be determined without the need for a trusted middleman.

EASILY TRANSFERABLE

The transfer of NFTs is based on their uniqueness and indivisibility. Therefore, the selling and purchasing of each of the tokens will take place in the ecosystem's unique NFT marketplace.

TRUSTWORTHY

NFTs are built on top of blockchain technology. As such, you can rest assured that the NFT you hold cannot be counterfeited.

METAWORLD

There is a liberating feeling in the virtual world as people are able to break away from the real world and live almost a parallel life where they can reinvent themselves. The real world obstacles and pressure that obstruct people's advancement in the physical world do not necessarily follow an individual into the virtual world.

There is a liberating feeling in the virtual world as people are able to break away from the real world and live almost a parallel life where they can reinvent themselves. The real world obstacles and pressure that obstruct people's advancement in the physical world do not necessarily follow an individual into the virtual world.

W3M TOKEN NFT

Our MetaWorld will consist of three major stakeholders: buyers, sellers, and renters. Sellers will get money in the form of an increase in the value of their virtual assets and land rent.

W3M Token is a vital component of the metaverse platform, and we are aiming to build fundamental dynamics that will make it inextricably linked to the platform's value. W3M Token is a Multi-network token that is built on Binance Smart Chain and Ethereum Network and will be the foundation of transactions on our network.

WHY YOU SHOULD INVEST IN W3M TOKEN

W3M Token facilitates and brings virtual and in-game assets closer to a wider, almost mainstream audience. An added benefit of W3M Token and its linked ecosystem is that it is completely decentralized, so trading can be done freely and across borders without any intervention from a middleman. This also allows you to transact with W3M Token from anywhere in the world, with little to no cross-border transaction fees. This is in contrast to international payments made with the traditional financial system.

Blockchain and cryptocurrency technologies will revolutionize the financial industry, which will leave everyone more financially connected, enabled and most importantly, empowered. Since W3M Token is built on top of a high speed blockchain network, there are no intermediary institutions or governments involved in the transaction process.

Additionally, transactions on the W3M network are almost instantaneous, as it eliminates the inconvenience of typical authorization and waiting period requirements.

There is also a large amount of liquidity behind the W3M Token since it is traded on popular cryptocurrency exchanges across the globe. W3M Token's high levels of liquidity ensure fair asset prices, market stability, higher technical analysis accuracy, and faster transactions.

When compared to the legacy financial system, transactions using on W3M Token are much more secure and transparent because each new transaction is encrypted and linked to the previous transaction in the network. W3M Token relies on complex mathematical numbers and strings, making it impossible to alter records on the network. This immutability and incorruptible nature of the W3M Token makes it safe from falsified information and potential hack attempts.

Getting started with W3M Token is a straightforward process, and all you need is a smart device with an internet connection to get started!

TOKENOMICS

The name of our token is W3M Token and it has the ticker symbol W3M. Our token is built on the Binance Smart Chain (BEP-20) and Ethereum network (ERC20), and has a total supply of 100,000,000,000 W3M. Of these tokens, the allocation will be as follows:

ROADMAP

2022

TOKEN PRESALE

- 20% of the total allocation will be up for sale

EXCHANGE LISTING:

- We're listing W3M in about 10 trusted exchanges

STAKING PLATFORM RELEASE:

- W3M will launch a staking platform where users can earn 5x rewards

2023

SELLERS PLATFORM:

- Launch our seller's platform where users can built their metaverse stores

NFT MARKETPLACE:

- Launch the NFT Marketplace
- Website version 2.0 Launch
